

# FantasyStock

Introduction: FantasyStock is a web application made to let individuals unfamiliar with the stock market gain familiarity in a risk free, gamified manner, that also allows them to connect with like minded people.

Expected Features: Create and join group games where they can create a portfolio and see their performance in relation to others in the group in a user defined amount of time. Additionally, FantasyStock will also keep users up-to-date on current business related news, allow for communication within leagues, add friends, edit their profile, and buy badges.

# FantasyStock

Final Deliverable: See Proof of Concept

# Milestone 2

Current Stage: Working Proof of Concept

Features Completed: Testing, Fixing, and Approving

Features Remaining: Testing, Fixing, and Approving

# Final goal of the project
